Technical Integrations

The Casita Service - API Integration

- Casita was the first student accommodation website to link directly into the CRM's of some of the world's leading recruitment agents, online agents and rankings/search websites
- Allows a seamless student booking experience with support from counsellors, to increase conversion rates
- **Book Now** function for select properties that offer live availability and pricing

Types of integration

- Trackable links with cookies
- White-label
- Full API
- Search widgets
- Bespoke and multi option approach

Trackable Links with Cookies

- Persistent cookies that last 500 days and renewed for another on every visit to website using the link
- If user visits the website directly, user will still be tagged against IDP partner account
- Special home page with your IDP logo with brief introduction for our partnership
- Does not require any coding
- Can be shared with your students in marketing materials or listed on your website
- Can be configured with links to City/Country/Universities specific pages

Trackable Links - Examples

Full API – Example (CRM)

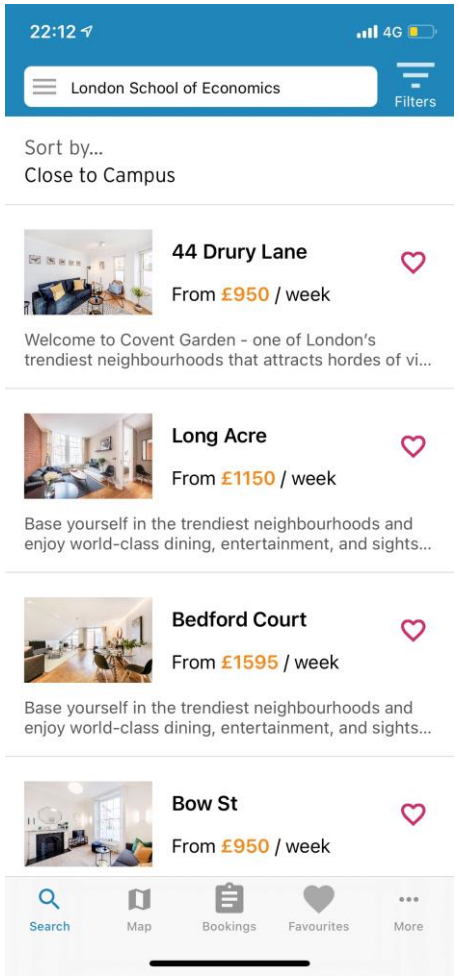

CRM: SI-UK

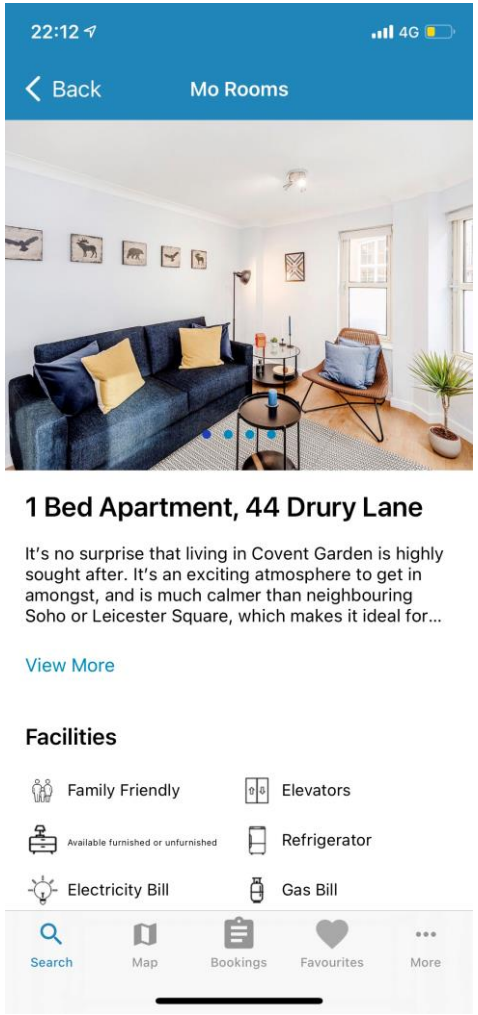

Full API – Example (App)

App: UK Unifyed (Acquired by UCAS)

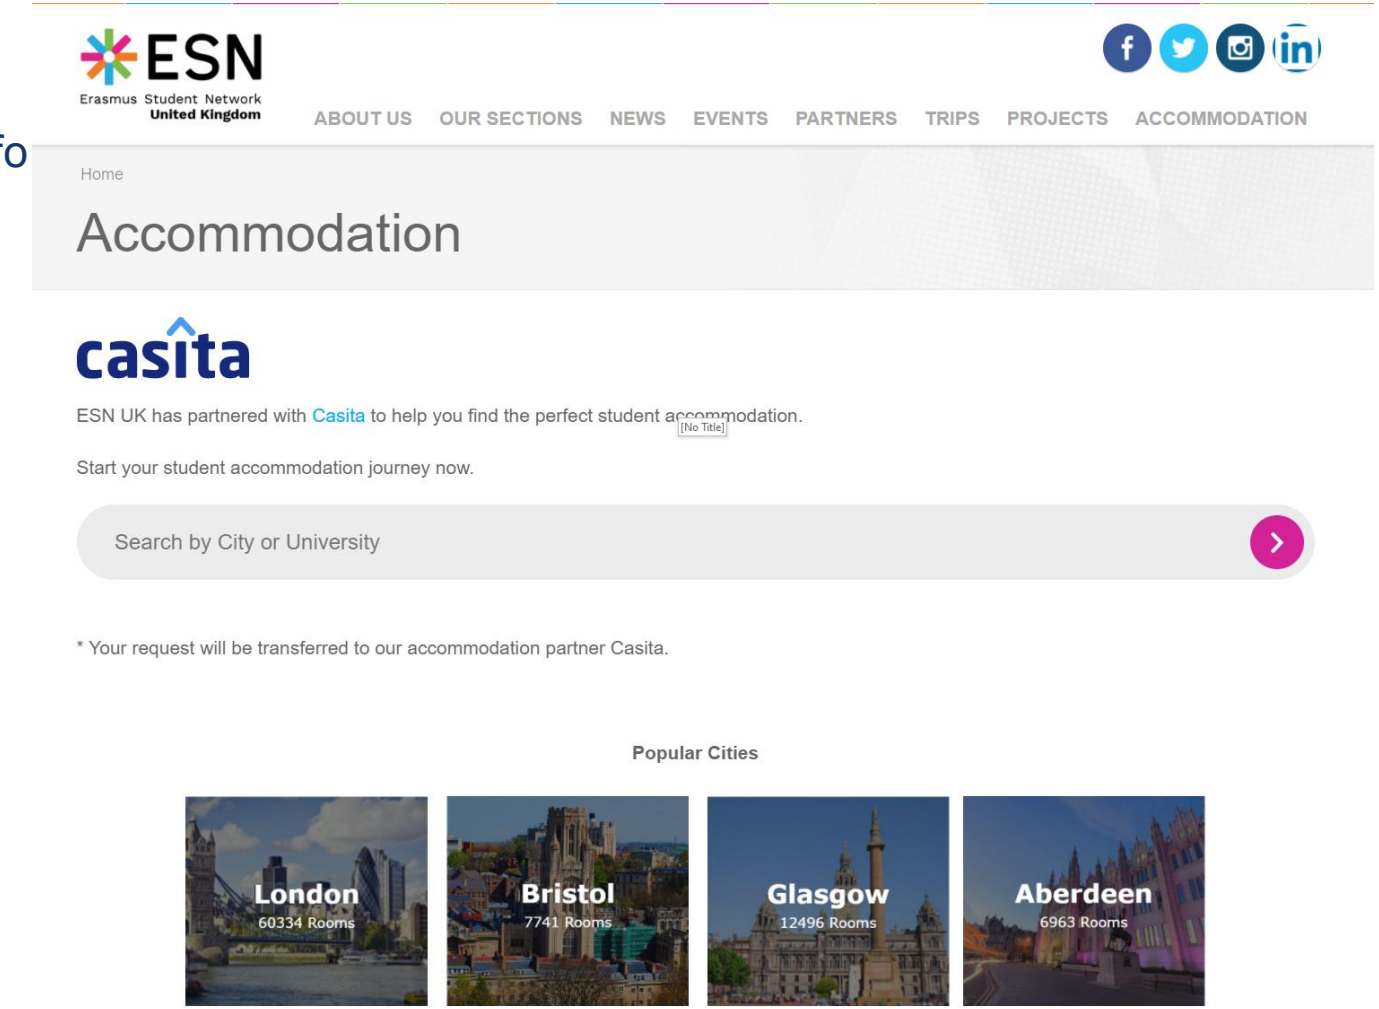

iOS: https://apps.apple.com/us/app/mo-uk-university-degrees/id1289700601
Android: https://play.google.com/store/apps/details?id=com.grantfairy.android&hl=en_SG

Search Widget

- Have a dedicated accommodation search section on your website/student platfo
- Easy iFrame integration
- Have full auto-complete search experience
- Populate city/University/building data

URL: https://esnuk.org/accommodation

Combination of Types

- You can combine different type of integrations to fit your purpose and student experience
- Example 1: You can mix the search widget which takes your user to city listing page with white-label view
- Example 2: We can provide you a list of all cities / university pages with your unique trackable UTM link that takes the student direct to the result page
- Example 3: You can develop API’s to get you the listing pages then upon clicking take the user to our building end page with your white label view.
- Prefer a bespoke approach. We can brainstorm with your product and tech teams to come up with the best mix and match options that fits your student experience and journey goals.
